

CLAIMS

1. A workstation having a cabinet for a central processing unit comprising:
 - an elevated work surface for supporting a computer screen;
 - a cabinet disposed under said elevated work surface and structured to conceal a central processing unit;
 - said cabinet having a front door, an inside side wall, an outside side wall, a bottom wall, a rear wall and an interior space;
 - said interior space for receiving a central processing unit;
 - said inside side wall having a front edge and a rear edge, said rear edge including a recess for providing access to said interior space and to a central processing unit disposed therein; and
 - said rear wall includes an opening covered by a removable grommet for providing access to said interior space and a central processing unit disposed therein.
2. The workstation as claimed in claim 1 including:
 - a rear wall, a portion of which forms said rear wall of said cabinet.
3. The workstation as claimed in claim 1 including:
 - a side wall which also forms said outside side wall of said cabinet.
4. The workstation as claimed in claim 1 wherein:
 - said door is hinged to said outside side wall of said cabinet.
5. The workstation as claimed in claim 1 wherein:
 - said bottom wall extends from a front of said interior space to said rear wall of said cabinet.

6. The workstation as claimed in claim 1 including:
an opening formed by said bottom wall, said cabinet rear wall and said recessed rear edge of said inside side wall wherein access is provided to a rear portion of a central processing unit disposed in said interior space.
7. The workstation as claimed in claim 1 wherein:
said grommet includes a plurality of curved openings.
8. The workstation as claimed in claim 1 wherein:
said grommet includes a plurality of slotted openings.
9. The workstation as claimed in claim 1 including:
a grommet frame mounted to said cabinet rear wall around said rear wall opening.
10. The workstation as claimed in claim 1 including:
a pedestal located spaced from said cabinet and disposed under said elevated work surface.
11. The workstation as claimed in claim 1 including:
a keyboard platform mounted to said elevated surface.
12. The workstation as claimed in claim 1 including:
an opening formed by said bottom wall, said rear wall and said recessed rear edge of said inside side wall, wherein access is provided to a rear portion of a central processing unit disposed in said interior space; and wherein
said grommet includes a plurality of curved openings.
13. The workstation as claimed in claim 12 wherein:
said grommet includes a plurality of slotted openings.

14. The workstation as claimed in claim 13 including:
a grommet frame mounted to said cabinet rear wall around said rear wall opening.
15. The workstation as claimed in claim 14 wherein:
said door is hinged to said outside side wall of said cabinet.
16. The workstation as claimed in claim 15 including:
a pedestal located spaced from said cabinet and disposed under said elevated work surface; and
a keyboard platform mounted to said elevated work surface.
17. The workstation claimed in claim 16 including:
a rear wall, a portion of which forms said rear wall of said cabinet;
a side wall which also forms said outside wall of said cabinet; and wherein
said bottom wall extends from the front of said interior space to said rear wall of said cabinet.
18. The workstation as claimed in claim 17 including:
a lock to secure said door.
19. A grommet for covering an opening in a workstation wherein said grommet includes:
a peripheral portion and a central portion, said peripheral portion for mounting the grommet and said central portion for organizing electrical and/or data transmission cables and/or wires and for providing ventilation, said central portion including a first section having a plurality of openings, each opening having at least some part formed with a curved geometry and a second section having a plurality of elongated slots.

20. The grommet as claimed in claim 19 wherein:
the plurality of openings are aligned; and
the plurality of elongated slots are aligned.
21. The grommet as claimed in claim 20 wherein:
the plurality of openings are aligned vertically.
22. The grommet as claimed in claim 21 wherein:
the elongated slots are arranged to have a vertical disposition and the plurality of
elongated slots are aligned horizontally.
23. The grommet as claimed in claim 22 wherein:
each of the plurality of openings has a bullet-like configuration.
24. The grommet as claimed in claim 22 wherein:
each of the plurality of elongated slots has a narrow opening.
25. The grommet as claimed in claim 19 wherein:
each of the plurality of openings has a bullet-like configuration.
26. The grommet as claimed in claim 19 including:
a frame for engaging said workstation at said workstation opening.
27. The grommet as claimed in claim 26 wherein:
the peripheral portion of said grommet engages said frame.
28. The grommet as claimed in claim 27 wherein:
the plurality of openings are aligned; and
the plurality of elongated slots are aligned.

29. The grommet as claimed in claim 28 wherein:
the plurality of openings are aligned vertically.
30. The grommet as claimed in claim 29 wherein:
the elongated slots are arranged to have a vertical disposition and the plurality of
elongated slots are aligned horizontally.
31. The grommet as claimed in claim 30 wherein:
each of the plurality of openings has a bullet-like configuration.
32. The grommet as claimed in claim 31 wherein:
each of the plurality of elongated slots has a narrow opening.
